AA-AB	2 U.I.D LEAD-GLAZED COARSE EARTHENWARE BASE SHEAR (MEND). PASTE IS orange-red with frequent mica specks, sand inclusions AND VERY OCCASIONAL gravel. LEAD glaze on interior appears olive-brown with darker brown motifs and specks. Intermittent glaze appears on exterior of base + on bottom of vessel - non-intentional?
/ AC	1 U.I.D Lead-glazed, thick coarse earthenware body sherd. Paste is red with occasional mica specks, red ochre AND SAND INCLUSIONS. DARK BROWN lead glazed interior AND exterior is decorated with a dark brown, thin lead glazed concentric line + 2 incised, thin concentric lines
/ AB	1 U.I.D lead-glazed coarse earthenware handle frag. Probably burnt. Paste seems light brown w/ 01/10/96
/ AE	1 Tin-glazed earthenware body fragment. Paste is very soft + off-white in color. Interior glaze is cobalt blue on white, motif UNKNOWN, AND exterior glaze appears black maybe resulting from post-depositional processes OR possibly burnt - (less likely)

BRICK + COBBLE RUBBLE Layer (Short title) Lot 108

Cat No.	Description
✓ AF	1 Tin-glazed earthenware body fragment. Buff-colored paste, relatively hard with mica + black specks, Cobalt blue on pale blue glaze. Partly present on one side. Glaze missing from other side.
✓ AG	1 STAFFORDSHIRE slipware earthenware body sherd.
✓ AH	1 probable Rhinish-Bavarian stoneware body sherd. Evidence of an unintentional flaw on corner of sherd.
✓ AI	1 probable English Brown stoneware fragment incised concentric parallel lines on one side, glaze missing from other side - interior.
✓ AJ	1 white salt-glazed stoneware incised probable plate rim sherd. Evidence of overglazing on exterior - coarse texture.
✓ AK	1 white salt-glazed body sherd undecorated. Throwlines present on exterior.
✓ AL	1 UNDECORATED porcelain rim sherd. Extremely thin, probable tea-cup.
✓	1 white kaolin pipe stem fragment - bore diameter = 4/64"
✓	1 white kaolin pipe stem fragment. Pipe stem appears orange in color. I believe that this is a post-depositional anomaly + not a terra cotta pipe. In fact there is brick-like residue present in patches as if a brick maker was smoking + he dropped his pipe into the brick paste. bore diameter = 4/64"
✓	white kaolin pipe bowl fragments. One is decorated, it has a raised cordoning line around bowl rim.
✓ 55	probable olive-colored bottle glass fragments. Body sherds. Most heat altered + heavily patinated.
✓ 8	probable olive-colored bottle glass fragments - lip + neck sherds - some most altered + heavily patinated.

ED 12/30/03 ↑
I entered the (10) pipe bowl frags as 2 entries of: (9) + (1) was decorated. Sharon
